Super Gem Belemnite 36.54cts

We have secured the best parcel of opalised Squid I have ever seen. My daughters will both be having earrings made from this parcel.

As you can see there is quite a range of prices for these squid. In this Offer we have a beautiful piece with a nice colour bar running through the top for only \$50 which is only \$2.85/ct which is absolutely ridiculous. Ten people will want this \$50 squid, the first person will get it but I will have others from this parcel for those who miss out I have alternative pieces.

The \$272 parcel has 12 little squid pieces which works out at only \$22.65 each. These are brilliant stones and worth at least double what I ask.

The \$295 belemnite is a magnificent blue green crystal, pointy at one end and is only \$28.90/ct, unbelievable price for such beauty and rarity.

These squid will make wonderful pendants or rings or if you can get a big one and cut it in two have matching earrings. I was going to value the gem blue green at \$500 but I've reduce it to only \$375. Why? I can't even tell you.

You can't see much of the \$500 squid piece but when the skin comes off you are going to have the most brilliant colour. You really should have it polished so that you'll get the fair value.

There are many many shell pieces in the ounce for only \$550, this material can be used for inlay, solid opals, you can make doublets, I love them.

The Super Gem Belemnite \$595 is a beauty at \$100/ct, skin to skin, take that little bit of skin off and the opal is going to jump out at you.

The \$1,500 piece for 3.75cts will make a great ring as it is, you don't have to touch it, the way it has been broken off in the mining needs it to be set for a magnificent ring.

If you like blue green just take the colour off the \$2,000 squid piece.

Perhaps the best grade in the whole of this Offer are the two belemnite pieces which are only \$2,750 the pair, they are both out of the one belemnite and would make a wonderful pair of earrings. You could cut the biggest one in two for a pair of earrings and the lighter one of the two could become a magnificent ring. I expect this will be one of the first to sell in this Offer.

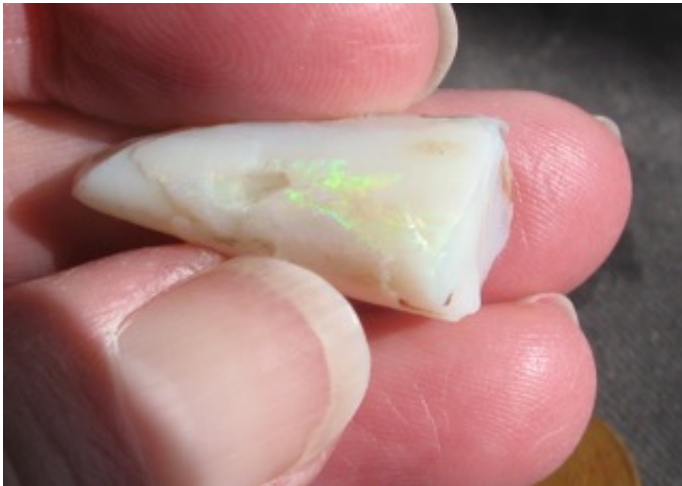

The granddaddy of them all is the belemnite 50mm long with a diameter of 6mm weighing 41.5cts and is only \$3,000. Once the skin is taken off this again brilliant colours will just jump out. I would like to see it left in one piece but the owner may well decide to make a pair of earrings and a matching ring from it.

You won't see better shell pieces than in the parcel for \$13,500, this will cut solid opals, can be used for inlay, nothing here for doublets it's all too good. We have more pictures if you wish to email us and ask.

It is with great pride that I offer you this parcel.
