HB

We have a small parcel which would suit the cutter and it is most affordable, only \$1,200. Very seldom that a king stone (the best stone in the parcel) is the largest stone. One time when Australian Opal Mines was mining on the 8 Mile field there was an exception to the rule and the king stone in the parcel weighed approximately 5.75oz which was fantastic. In this parcel the largest stone weighs 2.23oz and measures 2.75" x 1.5" and is .75" thick/65mm x 40mm x 20mm. There are wonderful golds, reds and greens, of course there is going to be more than one stone, you will probably cut 5 or 6 stones out of this king stone but they'll all be beautiful.

The second grade only has five stones but one of them is unique, it's part of a gem shell which measures approximately 18mm x 11mm. All you have to do is polish the top off and you will have a beautiful pendant or ring stone. Each stone will cut a stone.

The third grade contains 3 oz, 19 stones. Again, every stone will cut a stone, not as brilliant as the top two grades, that's why they are in the third grade but there is some brilliant colour in some of the stones, it's not as complete as in the top two grades.

I can highly recommend this parcel, it is only \$1,200. I believe there is going to be more than one person that wants it so please be quick. We very seldom get lovely little parcels like this to offer to our professional cutters or something that a hobbyist can afford.

The first in will buy it.

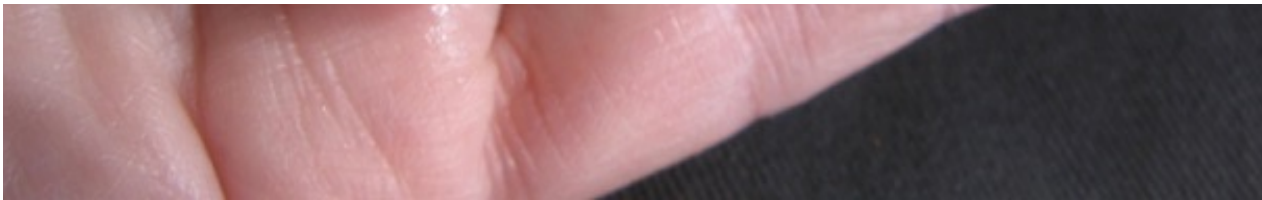

Regards

Murray

\$1,200 3 grades

- 1-5. IMG\_1307 Coober Pedy 65mm x 40mm x 20mm 2.75" x 1.5" x .75" thick 2.23oz Grade 1
