Subject: SPECIAL Freeform Earrings & Single Beads OFFER 6 Nov 2017
Date: November 5, 2017 at 9:15 PM
To: Heather BAKER (work) Heather@AustralianOpalMines.com

The first six packets offered today are only the cost of cutting, the opal is really for nothing. Cutters in Australia today are quite expensive but they do do very good work, we have to admit that. What you see in this Offer are mainly freeform earrings from the Olympic opal field which is considered one of the very best fields at Coober Pedy.

The \$110.80 pair are really nice.

They are all nice of course but some are better than others.

The two very large pairs \$203.65 24.46cts, that's only \$8/ct which is ridiculously priced for such a pair of earrings.

The \$225.80 are only \$8/ct also with beautiful colours and interesting shapes. If you were a manufacturing jeweller who would make up earrings from these two would at least treble your money.

The 20mm x 20mm black stones \$71 pair 35.6cts are only \$2/ct. There is no precious opal in these blacks, they are drilled and could be mixed with other beads to create something quite sensational with a contrast to the black potch and beautiful opal mixed together.

The Andamooka freeform bead for \$295 is absolutely super gem material which would make a lovely focal bead, it could be made into a ring even. You might like to buy some other beads to mix it with.

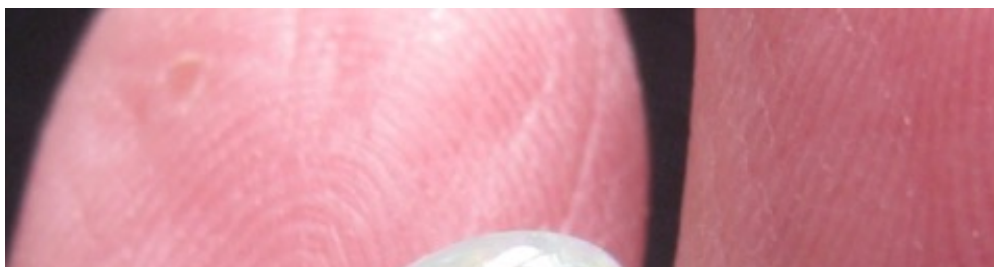

My favourite of all this is the Lambina bead for only \$295, it's an absolute bargain, you could cut three stones out of this, the green one off the top would be small, the other two would be large. I am serious when I say that this bead really should be at least \$700. As it is it is only \$8.57/ct and I'm proud to be able to offer you such beautiful beads for such little money.

The best pair of rectangular stones, Lambina greens, \$314 match beautifully, they are 14mm x 9mm.

We shall stand back and wait for the rush.

Murray
