HB

Today we have a number of faced and cut opals that we are going to share with you for only half price. You will see the original price in black crossed out and marked half price in red. We are proud to offer you these.

I particularly like the Coober Pedy faced stone for \$200, if you go down low and take some of the potch off the top you are going to get some magnificent very large opals out of that piece. It weighs 2.5oz as it is, you'll get plenty of carats out of that.

There is a Coober Pedy semi black there 27.9cts only \$45 which is less than \$2/ct which is ridiculous.

I love the Black for only \$52 5.25cts it has some sand spots in it but where else can you get a black opal for that money. Some of the spots could come out with a dremel.

The seashell is a bargain particularly the \$200 one 38.72cts, that's only \$5.16/ct. You'll never buy another beautifully shaped shell like this with this colour.

The same could be said for the Andamooka bead \$70 now only \$35 which is just over \$1/ct.

Probably the best deal of all is the faced Black 5.98cts should be \$450, it's a gift for \$225. There will be 10 people that want that one so please be quick.

The semi Black for only \$70 11.7cts is also a bargain.

They are all bargains!!

Go for it!!

Murray
