HB

Boulder Opal is becoming more and more popular and prices have risen dramatically however it has been years since these Boulder Opals were extracted from the ground in Queensland and you are getting the before prices are reassessed.

Beautiful faced pieces here, the \$82 Boulder is a beauty, there is not only Boulder opal but next to it as you roll the stone there are reds sitting right on the ironstone. You are getting twice as much colour as you would normally see.

I like the .361oz \$65 stone, no doubt a number of you are going to want that so again, first in will be the lucky one.

The 1oz \$58 stone is really large, quite a special.

The 1.07 kilos Boulder (34.24oz) for only \$125 is an absolute gift.

You will enjoy the 3.2oz Greens & Blues only \$75, just about the whole face is covered with blues and greens, it looks like the ocean with currents running through it.

You will like the \$68 2oz stone it will sit flat in four different ways so if you have it as a specimen and are not cutting it, you can look at it different ways each day. But you will cut it because there's opal on the back as well.

I like the 12.8oz huge stone with pale blues only \$78. There is a lot of opal on the front, half the front is covered in opal and on the back if you wanted to you could cut off another stone that would be worth \$78 just by itself.

At the bottom of this you will see an 8oz Mixed special, most of the stones are from Andamooka. This parcel really should have been classed and put into Andamooka or others but we drop it off to you as a special today for only \$224. A lot of the stones have been tumbled. There are some beautiful blues and greens and even some reds in some of the stones. It has been a long time since we have been able to offer you opal like this at only \$28/oz.

Good buying.

We look forward to hearing from you.

Kind regards

Murray
