Subject: **Interesting OFFER 3 Jun 2011**

Today we have some more interesting articles, I'm not going to send you pictures of many because it's Friday and we are busy but what we are sending you is beautiful and top value.

I was rummaging through my opals this morning and came across this beauty and what a pleasant surprise it was too. This beautiful Painted Lady has been polished and has gem red, blue, green & gold opal across its face. It stands 3" x 2.5" x 1.5" high and would make a magnificent desktop piece. It can sit three different ways, each way as beautiful as the other. If are the adventurous type of person there is a bar which can be seen (to the bottom right of the photo) which may well reveal much more of the gem opal if ground down some more, which indeed would add more to its value.

You will need to be quick if you want to snap this one up especially at the low price we have put on it at only \$395, so don't dilly dally. Send us a quick email immediately to secure this terrific wonder of nature.

Now I have another magnificent stone, Andamooka Painted Lady \$495 and I had it on my desk, I just secured it but I have to claim old age here, I can't find it. We have a picture of it though, it's a magnificent piece, if you look at it one way it looks like a car and if you turn it up the other way it looks like a fish, when we find it you are welcome.

For those of you who don't want to spend hundreds of dollars for Painted Ladies I have two for less than \$100. The first is \$72 3" x 2.5" x 1" thick, it has lovely green colour across about 1/3 of the face, there is a bit of sand on the top of it which could be buffed off and it'll look even better. If a miner were to find that today you would have to fight him to get it off him for only \$72 and remember your dollar isn't worth as much as ours now, so you are getting all of this as if your dollar was as it used to be.

There is another Andamooka Painted Lady 3.5" x 1.5" x 1" thick and has a gem blob in the corner. The blob is very thick, you can cut a nice stone out of that or just polish it up and have it as a magnificent specimen. There are another couple of little lines running though the piece which join up with the blob. There is a chance if you work carefully you could treble the size.

Now there is something that is really exciting, you may not have seen this before. We have some beautiful opalised sea shells that have been drilled. You can put a cord through them or a wire and they are ready to wear. They are unique. Shells are millions and millions of years old. There is a packet here of 8 shells 224cts you can select one for \$50 each or you can step up and buy the \$400 worth for only

\$270, now that is indeed a bargain. It should be because you are on our special Offers List.

Below are four more pictures of magnificent shells that have been drilled and are ready to wear.

There is an absolute super bargain, the Andamooka Matrix opal, rectangular 7.92cts 18mm x 13mm, beautiful golds, blues, greens which would make a magnificent man's ring with bevelled edges so it won't break easily and it's yours for only \$95.

And to add a bit of variety, last but not least is a beautiful Boulder opal. This could be cut into one large pendant or there is one gem end to it which could be cut into a beautiful cut stone, leaving another rectangular stone with beautiful blues for only \$150.

Again first in best dressed. I hope you enjoy looking and hope you buy one or two things.

Regards

Murray

1. \$37 IMG_3733 Shell Opalised Pendant 59cts
2. \$42.75 IMG_8444 Chrysoprase Specimen \$75/kilo .57 kilo
