HB

The following five stones just walked into our office.

There's a magnificent, brilliant dark reds, reds, golds and blues ring stone 22mm x 15mm 10.5cts only \$299. Now if this were a Lightning Ridge black opal which it isn't you'd be talking a minimum of \$7,000 for such a stone. As I said this is a magnificent piece and for \$299 only an absolute bargain. If you want something that's outstanding grab this ring stone for \$299.

Now for Texans or anyone who would like a huge pair of matching earrings with dark reds and all shades of greens this pair is a must 47.5cts at only \$10/ct \$475 for earrings that you'll never wear without people asking you "what is that you are wearing?" We could have them set for you in gold or silver at a very reasonable price if you wish. I'm sure as Heather has suggested that if you wanted to wear one earring as a pendant when you weren't wearing the pair as earrings our jeweller could work out a good way of doing it, other than that either of the two \$183 and \$138 stones match the earrings so you could have a matching set, you can't go wrong. Four of these stones have come out of the same piece of opal matrix.

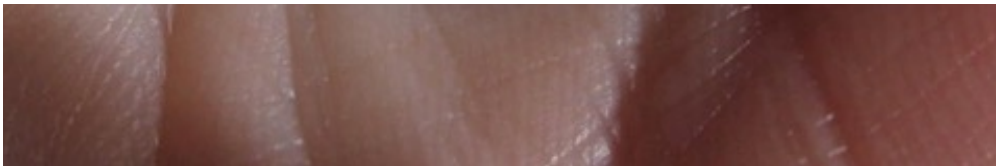

I forgot to mention that the earrings are also carved which adds to their beauty.

I offer you these at a really great bargain price but if you buy them all you may take a 25% discount.
