Subject: Mintubi Super Gem \$12,000/oz OFFER 3 May 2017
Date: May 3, 2017 at 2:29 AM
To: Heather BAKER (work) Heather@AustralianOpalMines.com

One of our very sophisticated opal clients has made most exotic jewellery from our Mintubi Super Gem material at \$12,000/oz see pictures (a) and (b) below of the finished jewellery. You'll be amazed to see the 2 rough opals that these super gems came from. Those two pictures are pictured directly the finished jewellery.

Today I am sending you a number of images of super gem material from the same parcel. This parcel was mined about 14 years ago, I didn't offer any to our clients for 10 years because I knew it was very likely we would never see a parcel like this again and I wanted to have opal like this when others didn't. Everything in this Offer is magnificent but if your pocket book will stand it I suggest you purchase either the \$2,940 stone which will face up as the beautiful green piece of jewellery, the \$3,480 stone which will be green or reds & golds as it's double sided or the \$3,588 stone which also double sided. I need not say another word, I leave the selection to you. If you would like me to call you about any of these super gems just email me with your number. For the professional cutters we supply I have included 1oz for \$12,000 containing 7 magnificent stones, if you can't double your money at least on this opal my name is not Murray Willis.

The .29oz stone measuring 43mm x 22mm x 6mm is a fantastic gem and so unique in that one side is showing brilliant reds and golds as in the stone, see below that has already been set in diamonds whereas the other side is showing magnificent greens, maybe with a hint of blue, I can't see exactly because there is a little bit of sand on it. The uniqueness of this stone would be able to be caught if it were used as a pendant with a swivel top, with some clothing the wearer may choose to have red and gold showing but with other clothing the brilliant gem greens with a dash of blue, so really you are getting two stones here for the price of one. The shape as it is will make a wonderful pendant. There is approximately 45cts in this stone in the rough and when it's cleaned up you should get somewhere between 35-39cts which makes this stone ridiculously inexpensive at only \$100/ct. I have seen material like this sell up to \$500/ct, in fact I have sold some myself. So the person who purchases this stone will have an absolute bargain.

I was amazed to see another double sided stone it is the stone for \$2,323, it has beautiful greens one side and reds the other. I can't see that it fitted on to the \$3,480 stone but I bet it wasn't more than 1.5" away from it in the mine. Incidentally my lucky number is 23 and this stone costs \$2,323.

We have hundreds of clients and certainly not more than 75 stones from this Mintubi Super Gem parcel to offer but I have selected some very small stones so that no-one can say:

"I love these stones but I can't afford one."

To alleviate that problem you will see that I have discounted 6 of the small stones from \$12,000/oz down to only \$8,000/oz and these stones can be bought for as little as \$208, \$219, \$310, \$418, \$445 and \$543. This is a once only deal we can't drop \$4,000/oz but I've done it this time to give everyone a chance to share in this magnificent parcel.
