Folks

When I first saw a strand of mosaic beads whilst visiting our bead cutter in Hong Kong I was amazed at the beauty and the manner in which these beads were made. It takes hours of meticulous cutting, matching and fitting very small pieces of opal to make these mosaics. It would send you and I mad attempting to do so. It is obviously sending the Chinese mad too because we have been told that they don't want to make them anymore and I don't blame them with the ridiculously low price that they have let us have these mosaics for. The strand is 16" long, the beads are 10mm and the price is only \$1,950.

We have two strands and one bracelet although the bracelet may not be available by the time this email Offer reaches you. I don't know anyone who hasn't been absolutely mesmerised by these beads. If you would like this strand please let us know. It's a bargain for only \$1,950.

Kind regards

Murray Willis
