Opalised Seashell OFFER 16 Oct 2014

Folk

We have never had an offer of just one single opalised seashell but today is the exception. I have in my hand a magnificent "clam" or "cockle" shell, see pictures below. It weighs 41.8cts, it has full colour, skin to skin. At \$850US it is only \$20.33/ct. The colour in this stone is worth at least \$80/ct, you can add an extra percentage because it is an opalised seashell which are hard to get and very unique. The front of this shell is almost perfect, the back of the shell has been left with magnificent markings for a specialist opal collector however in the mining a small chip has come off the back so you are able to see that this opal is absolutely skin to skin full colour of magnificent golds, greens with a tinge of blue. It is a bi valve with part of the hinge still attached, there is not much more I can say other than this shell is worth double what I am asking. Once again first in best dressed.

Regards

Murray
