I was just looking through a box of strands of opal beads we hadn't priced yet and came across these 10 matching strands that someone may like to have set as we had set for my daughter Kirsty in the picture below. Her beads are priceless but these beads are very reasonable at only \$300 or \$350/strand. They really look beautiful 3 or 4 strands strung together but we would sell them singularly if you are interested. I have never seen since 1962, when I first hit the opal fields, a necklace such as Kirsty's below. Why shouldn't you be the second owner of such a special and unique strand of glorious opal beads?
