HB

Today we have quite a unique Offer because we have six Super Gem 18mm x 13mm triplets that match. We have paired them up into three lots of two. They make great earrings, cufflinks or maybe a ring and matching earrings. I can just imagine a magnificent bracelet with either silver or gold with these six triplets showing. They are very reasonably priced at only \$210/pair. Try as we may with two different cameras that we use to try and capture the colours of the opal as our eyes do, we seldom are able to match what we see with our God given eyes. We would prefer to sell the six stones together so that we could see the creative finished product from our stone but we are prepared to sell them just as pairs.

We look forward to hearing from you.

Regards

Murray
