Today we are offering you four lots of Chips.

1oz for only \$250, absolutely brilliant, we are not 100% certain of the source of these chips but I believe they are Andamooka, they are small but gorgeous. Many of them would be very suitable for inlay. You don't get good inlay material like this for only \$250.

The second grade is interesting it is in a bottle shaped as a skull. Some ingenious person has put a beautiful cut stone with lovely reds, blues and golds and glued it to the screw top of the bottle. I am not sure how many ounces are in this bottle, I would say that there are at least 2oz. I'm too lazy to unscrew it and weigh them. Now I think this is ideal for a collector because of the uniqueness of the shape of the bottle and the lovely stone on top of it. The stone measures approximately 16mm x 14mm and is worth a couple of hundred dollars by itself so it's only \$575 and with the brilliant opal chips inside, this one is a bargain. Normally the chips just by itself are \$400/oz.

We have a unique little pair of opal hearts that are semi black, they weigh a total of 4.15cts. They are not exactly the same size but when one is on one ear and one on another, no-one is ever going to notice. They will make a gorgeous pair of earrings or a couple of lovely pendants for only \$250, I don't think they will last very long.

We wish you well and we look forward to your order.
