HB

Today we have some unique jewellery which is quite inexpensive for you. I have no doubt that a number of the items are going to be wanted by more than one person so please do be quick. Fortunately there are two beautiful gem triplet pendants at \$80 each but I imagine the two rings are going to be very popular, they are large, they are triplets and can be worn without fear of damage. If you are looking for something for your man this is it or the \$155 ring could be worn by a lady as well.

My favourite pendant that looks a bit like a shark's tooth is only \$250, that's brilliant as are the \$265 and \$99 doublets set in onyx. The \$99 doublet has been drilled and we will supply you with a bail to put in it, the same as any other items we are saying are drilled, we will have a bail for you.

My wife was after the Boulder Opal solid carved Cameo for \$299. I pointed out that she already has one so believe me that's good enough to be worn by an opal dealer's wife.

The magnificent pendant for only \$250 26mm x 14mm is set in silver and something that we have never had before are two mosaic opals 10mm round and 8mm round already strung as a pendant on a cord, that's a beautiful deal for only \$125.

I'll let the rest speak for themselves although I should say something about the carved onyx pendant that has the matching doublet for only \$160, that is unique, it is drilled so we can put a bail in for you. I don't think anyone else in the world will have something like that.

I do have to mention the beautiful jelly solid opal set in silver as a pendant, it's large, 18mm x 26mm and only \$400. The stone is worth more than \$400 so you are getting the setting thrown in for nothing.

Once again, first in best dressed. We are expecting to be knocked over in the rush with this lot.

Regards

Murray
